Back-End:

PHP | **Laravel** | SQL / PLSQL | MVC | OOP | API | Caching | **Inertia.js** | Redis

Tools & Version Control:

Postman | Git | GitHub

Experience

Semicolon Software Campany

Backend Developer • 10th Of Ramadan

01/2025 - 12/2025

I worked at **Semi Colon** as a Back-End Developer, primarily using **Laravel**, with additional hands-on experience in front-end development using **React** and **Vue**. During this period, I contributed to a variety of projects, including **e-commerce platforms**, customization of existing websites, **learning management systems (LMS)**, **multi-tenancy applications**, **booking systems**, and comprehensive **company management systems**. This role strengthened my ability to build scalable solutions, work across different architectures, and adapt to diverse business requirements.

Wiz Software Company

Full Stack web Developer • Remote

11/2023 - Present

As a web developer at Wiz Freelancer, I have successfully worked on multiple projects, including e-commerce platforms, the official Wiz Freelancer website, and various other systems. During this time, I enhanced my front-end and back-end development skills using **React** and **Laravel**, while building a strong understanding of SEO best practices, structured development workflows, and effective collaboration with Saudi-based companies.

WIZ Software Company

Salla&ZD Developer • Remote

11/2023 - 05/2025

I specialize in building e-commerce stores using Salla and Zid, with a proven track record of delivering 50+ successful online stores across various industries, including gaming, fashion, electronics, and more. My focus is on creating fast, user-friendly, and visually appealing storefronts tailored to each client's business goals.

Full Stack web Developer

OXFORD Academy • Remote

08/2024 - 11/2024

As a web developer for Oxford Academy, a UK-based educational platform, I was responsible for both the front-end and back-end development using React.js and Laravel API. I successfully enhanced the website's performance, achieving a 97% speed score, while ensuring a seamless user experience and scalable architecture tailored to the academy's goals.

Aflac Software Company

Oracle Apex Developer • Remote

01/2023 - 08/2023

I played a key role in developing an integrated ERP system, where I was responsible for designing and implementing the front-end interface and managing the databases using SQL and PLSQL. This project allowed me to apply my technical skills in creating user-friendly interfaces while ensuring robust and efficient database management. Through this experience, I deepened my expertise in front-end technologies and gained valuable experience in working with complex database systems.

Projects

Medical Appointment Booking (Multi-Vendor) - [Live](#)

A full-stack multi-vendor platform for booking doctor appointments, featuring a super admin dashboard to manage multiple doctors, medical centers, branches, and role-based user dashboards. Built using **Laravel**, **React.js**, and **Inertia.js**.

Learning Management System (LMS) – [Live](#)

Developed a comprehensive **LMS** using **Laravel**, featuring:

- Student, lecturer, and admin management
- Multi-authentication system
- Course uploads and advanced learning features

Designed to be **scalable, secure, and flexible** to meet diverse educational needs.

Oxford Academy Website – [Live](#)

Developed a UK-based educational platform using:

- **Front-End:** React.js
- **Back-End:** Laravel REST API

Key features:

- Fully dynamic pages, SEO settings, blogs, and courses
- Backend-driven content management
- Achieved **97% performance score**, ensuring fast and scalable delivery

WizFreelance Website – [Live](#)

Built the **WizFreelance** platform from scratch:

- **Front-End:** React.js
- **Back-End:** Laravel

Implemented a custom API to seamlessly connect both sides. The platform dynamically manages **products, services, and articles** through the backend, delivering reliable, real-world business solutions.

ERP System:-

Developed a custom **ERP system** using **Oracle APEX**, handling both:

- **Database Layer:** SQL, PL/SQL
- **Front-End:** HTML, CSS, JavaScript, Bootstrap

The system manages **finance, accounting, inventory, products, and banking transactions**, delivering a fully integrated solution for business operations.

E-Commerce:-

Built a complete E-Commerce website using:

- HTML, CSS, JavaScript
- React.js, Bootstrap
- REST APIs

Focused on performance, usability, and seamless integration between front-end and back-end services.

Blog Management System:-

Created a Blog System using PHP, including:

- Custom dashboard with role-based user management
- Categories and article management
- Dynamic content filtering and display

Optimized for easy content management and enhanced user experience.

Education

El Sewedy University of Technology(SUT)

Artificial Intelligence • 10th of Ramadan

05/2028

I am currently studying at Al-Suwaidi Polytechnic University, specializing in Artificial Intelligence through a curriculum based on accredited Indian and British standards, in partnership with AMIT.

Traning

Tarmeez Self-Training in Front-End Development Gained expertise in front-end development through self-directed learning and hands-on practice.

Array Back-End Development Training Developed skills in back-end development, focusing on server-side programming and database management.

In addition to formal education and training, I actively pursue knowledge through various online platforms, including Udemy, YouTube, and other resources. This ongoing self-education allows me to stay updated with the latest industry trends and gain extensive experience across different areas of technology and development.
